

## SPRING FEVER

Spring Fever is considered a joke—when someone else has it—but the condition is in reality no joke. Spring Fever is one of the terms applied to that general relaxed condition of the system which is so common at this season. It indicates, as a rule, a loss of vitality and a disordered condition of the blood. An effective remedy should be promptly used, because this condition readily becomes chronic. Our

## THE SECRETARYSHIP.

Atkinson Will Follow Carter by Resigning.

The resignation of Secretary A. L. C. Atkinson is not unlikely to follow the acceptance of Carter's resignation as governor and the appointment of Carter's successor. Atkinson wants to return to the law practice and has frequently expressed his intention to do so. He was, however, expecting to succeed Carter as governor, and was willing to hold on to his own office for the sake of his higher prospect. Carter's sudden resignation, however, before "Jack" is old enough to be governor, upsets all calculations.

In view of Atkinson's attitude it is thought to be not likely a new governor if he comes in will have a new secretary of the Territory with him. There are few candidates for secretary as yet, but W. R. Farrington has been mentioned as a possibility if Henry E. Cooper becomes governor.

## Dangers of Travel.

The Scientific American recently called attention to the odd fact that the man who rides a few score feet in a New York city elevator runs a greater risk of injury and death than the man who travels from New York to Chicago and back on the fastest trains. No fewer than thirty persons were killed, and many more hurt, in New York elevator accidents in the first nine months of last year. No such proportion of those who traveled on the fast passenger trains between the two cities were even hurt.

Yet the average man buys an accident insurance ticket whenever he starts on a railway journey of any length, and never thinks of such precautions before entering the car that lifts him to his office. Whenever a notable railway accident occurs he talks for days about the great loss of life. But he never thinks of the proportionately greater loss of life every day from accidents that befall men at home in their own houses. The returned missionary who publicly complained the other day that, after living entirely unhurt for four years among the wildest savages of Africa, he had no sooner returned to civilization than he met with a railway accident that kept him in hospital for six months, curiously illustrated the habit of the human mind to dwell upon remote dangers and ignore those near. Yet the fact is indisputable—the accident insurance companies have proved it to their financial loss and gain—that one of the most dangerous places where a man can be is in his own home, whereas one of the safest is in a first-class railway train at full speed, while the very safest place on earth is aboard a first-class steamship in the middle of the Atlantic or Pacific.

## Contracted Chronic Diarrhoea While in the Philippines.

"While with the U. S. Army in the Philippines, I contracted chronic diarrhoea. I suffered severely from this terrible disease for over three years and tried the prescriptions of numerous physicians, but found nothing that did me any good until I tried Chamberlain's Colic, Cholera and Diarrhoea Remedy, two small bottles of which entirely cured me and I have since had no return of the disease."—HERMIN STEIN, 212 N.
